

Robotics Programme

Where Creativity Begins!

Junior Engineers @ Work

Junior Engineers @ work is a thematic-based programme which aims to expose young learners to the world of robotics through the use of LEGO Education WeDo materials and activities. It encompasses specific subject matter such as Language, Engineering, Science, Technology and Mathematics.

The objectives of the programme are to enable participants to:

- Think creatively to make working models
- Develop vocabulary and communication skills to explain how the models work
- Establish links between cause and effects
- Reflect on how to find answers and brainstorm for ideas
- Present creative stories using models for visual and dramatic effects
